

## TRACK BENDS

Track bends are galvanised and formed to 90 degrees at 610mm, 762mm and 914mm radii, with 152mm of straight track at each end (track size 0.610mm only). N.B. It is essential that all track bends are supported in the centre with the appropriate bracket.

		Radius		
Track Size	1	610mm	762mm	---
	2	610mm	762mm	914mm
