

Smart Home

accessories

Smart Home accessories

for use with blinds, awnings, garage doors and skylights

Awnings, indoor blinds and curtains help regulate the indoor temperature of your home. With TaHoma®, you can regulate them manually or fully automatically using your smartphone or tablet. However, handy sun and temperature sensors make life even easier and ensure that you can get the very best from your products.

- A wireless temperature sensor for indoor and outdoor use
- Can be connected to various Somfy products (blinds, lighting, security, awnings) via the TaHoma® and pre-programmed scenarios
- Easy to install
- Transmits the measured temperature to TaHoma®

Control

your lights & equipment
with the push of a button

Switch your lights on or off or adjust them to the ambiance that suits your mood with the press of a button or with a pre-selected program. Somfy's electric sockets are easy to install and simple to use with a remote control.

If you combine them with TaHoma®, you can operate your lights and electronic equipment using pre-programmed scenarios, with time activation programs or manual controls using your smartphone or tablet - whenever and wherever you like. It's convenient and it's safe too. Moreover, you can give the impression that your home is always occupied, which will scare off potential burglars. That is Somfy Smart Home!

Plug RTS Indoor - Remote controlled electric socket - ON/OFF switch

2401524

- Remote-controlled on/off switch
- Can be controlled by smartphone, tablet or computer when combined with TaHoma®
- Can be used with time activation
- Very easy to install
- On/off switch

Specifications

Wireless range	30 m in non-built-up area
Communication	RTS (1-way)
Maximum capacity	30000 W - max. 16 A
Power supply	240 V
Warranty	2 years

Light bulb incandescent lamp Led Halogen

Lighting receiver outdoor ON/OFF
2400583

- Switch your electrical products such as outdoor lighting, fountains, etc. on/off by remote control
- Splash resistant (IP44)

Specifications

Measurements	110 x 110 x 40 mm
Protection category	IP 44
Communication	RTS (1-way)
Maximum capacity	500 W
Power supply	230 V

Light bulb compact lamp Led Halogen

Lighting receiver indoor ON/OFF
2401073

- Switch your indoor lighting on/off by remote control
- For indoor use, replacing current switch
- Also available as a panel (required ref. 9 154 122)

Specifications

Measurements	81 x 81 x 45 mm
Protection category	IP 30
Communication	RTS (1-way)
Maximum capacity	500 W
Power supply	230 V
Warranty	3 years

Light bulb compact lamp Led Halogen

Somfy Smart Home meets Philips Hue

Philips Hue is a wireless lighting system that adjusts the lights in your home to your personal lifestyle and all your corresponding preferences. Replace the existing bulbs with Hue bulbs, install the bridge, download the app... and get the party started!

The options of Philips Hue are endless. For instance, you can now operate all your Philips Hue lamps with Somfy Smart Home. Pair Philips Hue to the Somfy TaHoma® and discover how your Philips Hue lights can react to a Somfy light sensor or motion detector, so that the lights switch on automatically when you arrive or when it gets

dark. Or why not create a scenario with your Hue lights with your Somfy Smart Home applications for window furnishing or awnings for a pleasant ambiance in the house or on your terrace?

Philips Hue products are available from various electronic goods shops and do-it-yourself stores and online.

Security & surveillance

always keeping an eye on the situation at home

Use wireless sensors and cameras with the app on your smartphone to ensure you always and automatically receive reports on anything that happens inside and outside your home. You will receive a message if a motion sensor or smoke alarm emits a warning, even if you are not at home. And you can watch via a camera - what a sense of security!

Install a camera near your front door to see who enters your home. Or use a door and window contacts to monitor anyone entering your home (illegally). The TaHoma® app sends a message to your smartphone so you can take immediate action if it reports any suspicious circumstances. Motion detectors installed inside and outside the house can be adjusted to switch on the lights in the house or to roll down

the blinds automatically. It looks as if the house is occupied while you are away. Smoke alarms emit an acoustic signal if they detect smoke, but if you are not at home, TaHoma® will send you a message. Blinds can be opened and lights on to help people find the way out of the house during night. The possibilities are endless.

IP Camera

An IP camera paired to the TaHoma® allows you to monitor your home from a distance via your smartphone, tablet or computer. If a smoke alarm, motion detector, etc. is activated, you will get an alert in your smartphone and you can

easily access your camera to see what is happening. Those photographs are stored on a secure Somfy server, so you can view them anytime, anywhere in the world with your smartphone or tablet. A Somfy Security camera means you can always keep an eye on everything.

Somfy Security Camera - Indoor

2401485

Specifications

Measurements	43x90 mm
Power supply	AC Adapter
Warranty	2 years

- Keep a close and constant eye on everything that goes on in your home
